

Anatomy of a Credit Card

Name of the company through which the credit card was obtained.

Your credit card number. This number is unique to your credit card account.

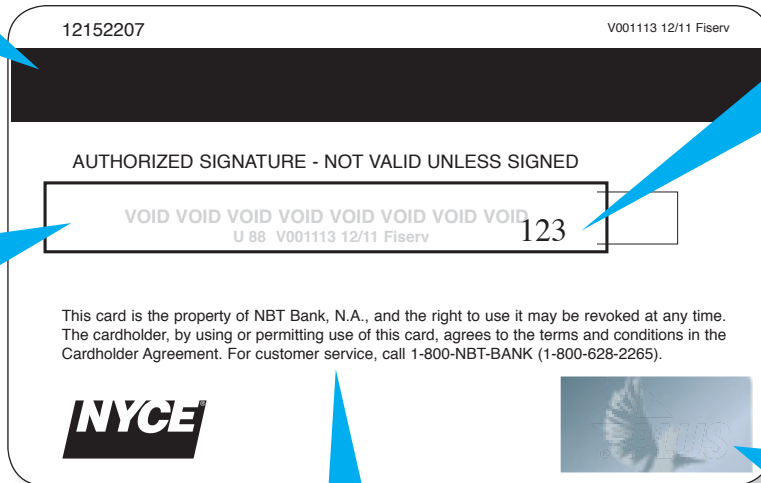

Your credit card's issue date (mm/dd/yy).

The type of credit card you are using, usually Visa®, MasterCard® or American Express®. Check with your merchant to see if they accept cards from these providers or before making a purchase.

The full name of the account holder. If you need to sign a receipt, you should sign it the way your name appears on the card.

Your credit card's expiration date (mm/yy).

The magnetic strip is used by computers to identify your card.

This three-digit number is your CVV2. This number is unique to your card and may be required when making purchases over the phone or on the internet to verify that you have the card with you.

Use this space to sign your credit card. Your signature is yet another form of protection against fraudulent use.

The hologram is an added security feature to help prevent fraudulent copies of the card being used.

A user agreement and customer service number are provided for your easy reference.
